First Contact

Greetings Lunar Shadow! In your mystery I watch with the eyes of a fair witness as you make first contact with your celestial opposite. The shadow you cast appears to be taking a bite out of the Sun! Help me to see, understand and name the shadow-pattern that consumes momentum and prevents forward motion. How can I expose and therefore break free from justifying agendas that eat away at my progress?

Second Contact

Dear New Moon, I call to you as you move between the Sun and Earth and cast the darkest part of your shadow, your umbra, over the Sun. Here I stand in preparation for total darkness and watch as your shadow moves across the face of the Earth and ask: What action can I take to fearlessly reach into the darkest part of my shadow and pull from it insights that inform rather than obscure my soul's mission on Earth?

Totality

Greetings Darkness! I stand tall and look at you with eyes wide open . Even in total darkness I can feel the shadowy crown I've placed upon your head. In return you have ruled a light-less path that has concealed, rather than revealed the light of my full purpose. For this reason I ask two questions in one: How can I totally remove myself from the rule of the Court of Shadow and fully take the lead when driving my destiny?

Third Contact

Farewell Darkness and Shadows! In your absence, the warm, energizing light from the Sun reappears! My eyes and spirit adjust to this new light that exposes a clear path for the taking. Receptive I stand before you and ask: What first step will illuminate a path that connects my commitment to my purpose?

Forth Contact

Greetings Light! This divination is receiving your bright blessings with recognition and gratitude. I clearly see how taking the sunless path only served to restrict movement and inhibit initiative. I now move with the intention of serving my passion over my shadow. How can I best sustain this fire that fuels vitality, drive and focus?
